# SHEEP & LAMB HEALTH

Ellie Stamper from our Cockermouth Country Store is one of our RAMA-accredited advisors

Ellie is specially trained to understand the causes, preventions and best-practice treatments of parasites, diseases, and performance-limiting infections and conditions on farm.

She is able to advise on the benefits and restrictions of all available medicines. Asking the right questions to establish optimal prescription advise for each farm.

She'll apply her knowledge of all the variable factors to establish a plan to administer the right product to the right animals at the right time

RAMA-accredited advisors are available in all of our 28 stores located from mid wales to Argyle, Bute and all counties in-between

## ewe PREPARATION

CARR'S BILLINGTON

### OVITHRIVE

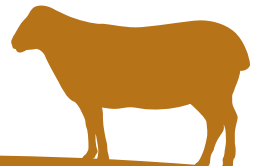

**A dietetic feed supplement specifically formulated to support and maintain ewe and ram body condition.**

- ✔ Contains high levels of vitamins to promote growth and improve carcass quality
- ✔ Includes high Levels of trace elements to balance deficiencies in grazing
- ✔ Dense in Lysine and Methionine supporting immune function, calcium absorption and to provide energy

**Available in:**

25 litre drum, 5 litre & 2.5 litre back-packs.

With and without copper

CARR'S BILLINGTON

## VITALYX SUPER EWE ENERGY & FISH OIL

Target nutrition from pre-tupping to lambing.

- ✔ Improves forage digestibility and intake.
- ✔ Maintains optimum body condition score and helps meet raised energy demands towards lambing
- ✔ Supports optimal fertility at tupping, creating stronger heats and reduces embryo losses.
- ✔ Supports immune system, lambing ease, and lamb vigour
- ✔ Promotes hoof integrity and reduces lameness

Available as: 20kg & 80kg tubs

CARR'S BILLINGTON

## VITAMIX SHEEP FORMULA

A specially formulated breeding ewe mineral to balance mineral deficiencies on grazing and/or forage diets.

- ✔ Contains generous levels of all essential trace elements and vitamins, including key B-complex vitamins - B1 & B12 Vitamin B12 helps to stimulate appetite and reduce ill thrift, essential in grazing areas low in cobalt

Available as: 25kg bags

CARR'S BILLINGTON

## EWE-LAC<sup>+</sup><sup>18</sup>

A high quality and highly palatable ewe feed suitable for feeding across a wide range of breeds and systems.

- ✔ Balanced, effective and safe energy supply from raw materials such as cereals, wheat feed and molasses
- ✔ High digestible undegraded protein (DUP) from AminoMax<sup>®</sup> for maximising lamb birth weights, milk production and milk quality
- ✔ High Vitamin E included at the recommended level of 150 mg/kg to help build immunity for increased lamb survival and vigour
- ✔ High selenium content to aid the prevention of selenium deficiency and boost lamb vigour

Available as:

Nuts or rolls in 25kg bags

CARR'S BILLINGTON

## EARLY BITE

A top quality lamb creep feed.

- ✔ Energy-dense from a balanced source of starch and digestible fibre to maximise energy intake and improve DLWG
- ✔ With EARLYBITE sensory additive to improve palatability and intakes for faster rumen development and better growth efficiency
- ✔ Contains Actisaf<sup>®</sup> live yeast to stabilise rumen pH, improve feed conversion ratio, promote fibre digestion, and ease transition onto concentrate feed
- ✔ High in digestible undegraded protein (DUP) to encourage better muscle and frame development

Available as:

Pellets in 25kg bags

CARR'S BILLINGTON

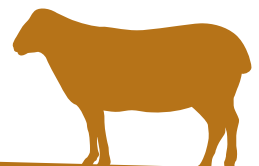

## MAZE LAMB

A very high density lamb feed for growing and finishing lambs.

- ✔ High starch from a high inclusion of barley to maximise weight gains and condition
- ✔ Various protein sources to maximise microbial protein production
- ✔ Generous levels of vitamins & minerals for general health so that live weight gains are maximised

Available as:

Pellets in 25kg bags

CARR'S BILLINGTON

## SUPERSTART LAMB COLOSTRUM

A complimentary feeding-stuff for new-born lambs, designed to enhance or supplement maternal colostrum when in short supply.

- ✔ Includes the NuStart® gut conditioner pack to support intestinal development using functional fibres for good bacteria
- ✔ High in natural antioxidants to encourage a healthy immune system from birth
- ✔ Contains dried egg powder which has immune supporting proteins provided during the most critical hours of a lamb's life
- ✔ EBL, TB and Johnes FREE

**Available in:**

250g / 500g / 1kg / 2kg tubs & sachets

Lambs should receive quality colostrum in the first 6 hours of life. Trial data also shows lambs fed a second dose within the first 12 hours have a higher immunity to disease challenge. \*Trial data reference.

[www.carrs-billington.com/lambing](http://www.carrs-billington.com/lambing)

When feeding colostrum remember the basic 3 Q's: **Quickly, Quantity and Quality.**

CARR'S BILLINGTON

## LACTOVIS LAMB MILK REPLACER

A high-quality, high-energy lamb milk replacer, specially designed to meet the nutritional requirements of the growing lamb.

- ✔ Offers concentrated and ultra-filtrated milk protein delivered from British milk, highly digestible for faster lamb growth
- ✔ Mixes in warm or cold water and stays fresh for 24 hours which makes it ideal to use with Heatwave milk warmer, Ewe 2 or Shepherdess feeder

**Available in:**

**Lactovis Instant** in 10kg bags for hand feeding

or:

**Lactovis Freeflow** in 20kg bags suitable for all feeding machines and ad-lib systems

Protein.....	25%
Oil .....	25%
Ash.....	7%
Fibre.....	0.1%

CARR'S BILLINGTON

## SUPERSTART LAMB GUARD

A complimentary feeding-stuff specially designed to be fed alongside colostrum to improve immune status in new-born lambs.

- ✔ Energy-dense to reduce the risk of lethargy and hypothermia
- ✔ High in antioxidants to support normal development of the immune system
- ✔ Contains an active egg powder to bind to harmful pathogens in the gut and reduce disease pressure

**Available in:** 100ml bottles

CARR'S BILLINGTON

## SUPERSTART LAMB BOOST

A supplementary feeding-stuff for new-born lambs and adult sheep to support energy requirements and immune development.

- ✔ Contains a highly digestible energy source to maintain body temperature and fat reserves for immunity and vigour
- ✔ Packed with gut-supporting prebiotics to encourage the development of the young and immature gut
- ✔ Includes a high level of antioxidants to support normal development of the immune system

**Available in:** 100ml bottles

# NUTRITIONAL DRENCHES

## CARR'S BILLINGTON SUPERKETO

**A multi-functional plant-based propylene glycol drench. Ketosis that's sustainable.**

- ✔ Offers a syrup of complex sugars and oligosaccharides that together feed rumen bugs whilst also bypassing the rumen into the intestine for rapid and progressive absorption to effectively support blood sugar levels
- ✔ The drench also contains plants-based agents to aid liver function, stimulate digestion and ingestion, and optimise ruminal function whilst protecting intestinal integrity

**Available in:**  
1,000 litre IBC, 25 litre drum, 5 litre, 1 litre, 500ml

## CARR'S BILLINGTON SUPERSELCO

**A vitamin and trace element drench specifically formulated for growing lambs.**

- ✔ Contains key micro-nutrients to promote growth and improve carcass quality
- ✔ Packed with key amino acids to support lean tissue development
- ✔ Includes trace elements to balance deficiencies in grazing

**Available in:**  
2.5-litre back-packs.  
With and without copper

## CARR'S BILLINGTON TWIN LAMB FORMULA

**A high energy concentrated liquid specially formulated to replace and rebalance the nutritional needs of ewes suffering from twin lamb disease.**

**Available in:**  
5 litre, 1 litre and 500ml bottles

### FLEXOTHANE CLASSIC ROTTERDAM TROUSERS

- ☉ Elasticated waist
- ☉ High frequency welded seams,
- ☉ Legs adjustable by press studs
- ☉ Highly tear resistant
- ☉ Machine washable

# PET LAMB FEEDERS

## SHEPHERDESS LAMB FEEDER

**A unique lamb milk feeder providing a simple system of delivering warm, fresh milk to lambs 24 hours a day.**

Simply plug into the mains and the milk remains at the desired temperature 24hrs a day. Eliminates the need for bottle feeding for pet lambs. Plus, as with a natural mother, the lamb enjoys access to milk 24hrs a day ensuring they thrive as normal.

## ewe2 WARM MILK LAMB FEEDER

**The Ewe 2 and Ewe 2 Plus are thermostat controlled warm milk feeders, for rearing orphan/surplus lambs which will help save you valuable time during one of the most labour intensive periods of the year.**

The Volac Ewe 2 teat bucket can rear up to 20 lambs and the Volac Ewe 2 Plus can rear up to 40 lambs.

## HEATWAVE MILK WARMER

**The Pyon Heatwave Milk Warmer is a warm milk delivery system for lambs, calves and goat kids.**

The Heatwave Milk Warmer uses a heat exchange technology to heat the milk on demand instead of it always being warmed; this keeps the milk fresher for longer.
